INITIATIVE

- We are committed to reducing our environmental impact
- We have developed an environmental management system to get it independently certified to ISO 14001, which is the most widely recognised global standard for improving environmental performance
- Our waste treatment facilities ensure that all wastewater is appropriately managed to minimise its impact upon the oceans. All general waste is treated onboard to reduce its volume prior to landing ashore, and wherever possible general waste is recycled
- We are reducing our air emissions through the implementation of fuel efficiency measures, including improved hull coatings, low energy lamps, increased recirculation of waste heat and improved efficiency in air conditioning, and we continue to explore new technologies
