

Carnival Cruise Line's Have Fun. Be Safe. protocols and procedures have been designed to maximize the health and safety of our guests and crew while delivering a fun and memorable vacation experience. Below are the measures currently planned, which are subject to change as further details are established. They will be updated in accordance with guidance from public health authorities.

For guests cruising on an Alaska summer 2021 sailing, please be sure to review the Protocols for Alaska Summer 2021 Sailings section.

#### **BOOKING**

The U.S. Centers for Disease Control and Prevention publishes travel advice, warnings and recommendations related to COVID-19, including for travel on cruise ships, which you should consult at the CDC's website before confirming a reservation.

#### **ENHANCED HEALTH SCREENINGS**

Every guest will undergo enhanced pre-embarkation health screenings. We will refer anyone with signs and symptoms of COVID-19, or who are identified at-risk, for additional medical screening before allowing them to board. Secondary screenings (and health checks throughout the cruise) will be performed when necessary. Contact tracing is planned for every cruise. Protocols are evolving and as changes are announced, we will share more information as soon as possible

#### **RESPONSIBLE PHYSICAL DISTANCING**

Physical distancing will be maintained throughout check-in and embarkation, and will be required in terminals, on board ships, on private islands, and during shore excursions. This will be managed by adjusting the flow of groups and through reduced occupancy, staggered activity times, and closely managed group sizes. Entertainment programs and restaurants will be designed to enhance physical distancing.

#### **MASKS**

Face masks for all forms of transportation are still required by the CDC; however, protocols are evolving and as changes are announced, we will share more information as soon as possible.

#### **PERSONAL HYGIENE**

Guests will be encouraged to use the hand-washing sinks and hand sanitizer dispensers at venue entrances and in high-traffic areas throughout the ship. Guests will be asked to follow health information about the ways to stay healthy on board and when ashore through daily programming,

entertainment systems, announcements, in-stateroom literature, and our app. There will be no self-service for meals. We'll do the serving for you.

### **SAFE SHORESIDE EXPERIENCES**

We're working with local authorities, destinations and tour operators so that the enhanced health and safety measures on board are maintained ashore. We will follow the health protocols for every port we visit. There may be a reduction in the capacity of excursions and tour vehicles. Only shore excursions that comply with our prescribed protocols will be permitted, with strict adherence required of all guests and denial of re-boarding for any guests who do not comply.

### **PROTOCOLS FOR ALASKA SUMMER 2021 SAILINGS**

Alaska cruises are available only for guests who have received their final dose of an approved COVID-19 vaccine at least 14 days prior to the beginning of the cruise and have proof of vaccination. Accordingly, the following applies only to these specific Alaska itineraries:

- All guests, including children who are age-eligible for vaccines, will need to show proof of vaccination.
- This means, that regrettably, guests who are not vaccinated, including children who are not yet eligible for a vaccine, will not be permitted to sail.\*

Our Have Fun. Be Safe. guidelines for Alaska voyages incorporate guidance from the CDC and Alaska officials:

- All guests will be asked to confirm their status as fully vaccinated for COVID-19 during check-in and provide proof of vaccination in advance of boarding. (As a reminder, "fully vaccinated" means the final dose of the vaccine was administered 14 days prior to embarkation.)
- It's important for guests to come prepared, as those who arrive at the embarkation terminal without the proper proof of vaccination will not be able to cruise, and no refund will be issued.
- Face masks for all forms of transportation are still required by the CDC; however, protocols are evolving and as changes are announced, we will share more information as soon as possible.
- While guests will be vaccinated, we will follow protocols and requirements for each destination while ashore in Alaska. Remember, these restrictions are under the control of local government and are subject to change without advance notice, so we encourage guests to come prepared for potential mask requirements ashore.

Please note that these guidelines are subject to change. \*Exceptions as required by law
